

# Lift & Slide Drive HS-100

AUTOMATIC LIFT & SLIDE DOOR

TEINO

# Comfortable operation with the lift & slide drive HS-100

The HS-100 lift-and-slide drive enables the VEKAMOTION to open and close automatically. The powerful drives unlock the sash, lift it up, and slide it open. Conversely, the drives close the sash, lower it, and therefore lock the door. The mechatronic components are concealed, and the simple control unit ensures easy and intuitive operation.

The built-in drives allow the door to run quietly and smoothly, thus offering maximum comfort.

## Advantages for the user:

- Intuitive operation
- Thanks to the integrated battery, the door can also be operated in the event of a power failure
- Mechatronics invisibly installed in the sliding wing
- Greater comfort

## Advantages for the installer:

- Installation of individual components without complicated milling work
- Quick installation thanks to pre-assembled modules
- Plug & play cabling system
- Simple selection of setup modes

## TECHNICAL DATA

- Sliding speed: 150 mm per second
- Power supply: 24V
- Min. wing height: 1920 mm
- Emergency release of the lifting drive underneath removable control panel
- Fittings (carriage & lock bar): Gretsch Unitas
- Max. wing weight: Up to 350 kg

# TEXINO

**DISCOVER THE BENEFITS OF A SMART HOME WITH TEXINO!**

## **OUR TURN-TILT DRIVE DK-100**

The DK-100 turn-tilt drive enables conventional windows to be tilted and closed automatically. The familiar manual handle operation always remains available.

## **HOMEMATIC IP PRODUCTS FOR A SMART HOME**

TEXINO is compatible with Homematic IP's portfolio of over 150 devices. The system is controlled via a central app that provides access to all components of the smart home.
